

FOR IMMEDIATE RELEASE

ObjectPAL.com: Premium Domain Name Positioned for Re-Emergence Following Vector Capital's Acquisition of Corel

WEST HARTFORD, CT — March 9, 2026 (Updated April 27, 2026) — ObjectPAL.com, the definitive digital address for the programming language powering the Paradox relational database, is now available for purchase. This announcement comes at a pivotal moment for the software industry, following the recent acquisition of Corel's WordPerfect Office suite by Vector Capital.

The return of the WordPerfect suite—including WordPerfect, Quattro Pro, and Paradox—to Vector Capital signals a strategic reinvestment in the high-retention, professional tools that define specialized legal, government, and enterprise workflows. As the "Object-Oriented" engine behind Paradox, ObjectPAL remains a critical skill set for maintaining and modernizing robust legacy systems.

“The acquisition of the WordPerfect Office suite by Vector Capital in 2026 signals a strategic reinvestment in the productivity and database tools that define professional workflows,” says Jim Fuhrmann, owner of ObjectPAL.com. “ObjectPAL.com stands as the definitive digital address for the language powering Paradox, the suite's relational database engine. It represents a unique opportunity for a visionary enterprise to bridge the gap between classic database reliability and the new era of productivity software.”

Strategic Value in the 2026 Tech Landscape

- **Vector Capital Synergy:** As the brand enters a new chapter of stewardship, ObjectPAL.com offers the primary identity for any developer portal, support hub, or modernization toolset targeting the Paradox user base.

Premium Domain Name Purchase for Purchase

- **AI & Legacy Integration:** With CorelDRAW and WordPerfect Office's recent pivot toward Generative AI, ObjectPAL.com is perfectly positioned for a platform offering "AI-Assisted Migration" or "Natural Language Query" layers for legacy Paradox databases.
- **The Circular IT Movement:** The domain serves as a flagship for sustainability advocates promoting "Software Longevity"—extending the life of existing data structures and hardware through efficient, local-first coding.
- **Authority & SEO:** As a direct-match domain for a specialized programming language, it carries intrinsic trust, high organic search potential, and instant credibility within the developer community.

Potential Ventures for ObjectPAL.com

ObjectPAL.com serves as a versatile foundation for various tech-driven ventures, including:

- **Modernization Middleware:** A home for APIs and bridges connecting ObjectPAL-based systems to modern cloud environments.
- **Specialized SaaS:** A brandable home for "Logic as a Service" (LaaS) or niche object-oriented database builders.
- **The "Paradox Pro" Archive:** A premium repository for technical documentation, code snippets, and developer forums for the dedicated Paradox community.
- **Strategic Brand Protection:** An essential acquisition for entities within the WordPerfect Office ecosystem looking to consolidate brand nomenclature.
